

Pratica S5L1

Come esercizio andremo a raccogliere informazioni su epicode.com come se non lo conoscessimo. Iniziamo cercando su google e visitando normalmente il suo sito. Andiamo poi a fare qualche query usando l'operatore `site:` per andare a vedere anche i sottodomini, facendo una ricerca di tipo `*.epicode.com`, che oltre ai risultati standard fornirà qualche pagina in più:

The screenshot shows a Google search interface with the query `site:"epicode.com"` entered in the search bar. Below the search bar are tabs for different types of results: Immagini, Video, Libri, Notizie, Maps, Voli, and Finanza. The search results show approximately 436 results found in 0.29 seconds. A "Promozione Google" banner for Google Search Console is displayed at the top of the results. Below the banner, several search results are listed, each featuring the Epicode logo, the domain `epicode.com`, and a brief description of the page content. The results include links to the main website, a page about learning to code, a page about tech competencies, a page about showcasing skills, and a page about local SEO and marketing.
